SUMMARY

Software Engineer with 5+ years of experience building enterprise web applications using React.js, Redux, JavaScript, TypeScript, and REST APIs. Experienced in delivering scalable solutions, collaborating with global stakeholders, and leveraging AI-assisted development tools to improve productivity, code quality, and software delivery.

WORK EXPERIENCE

Tata Consultancy Services, *System Engineer* Noida | 01/2021 – Present

Worked closely with national and international clients across multiple enterprise projects, translating business requirements into scalable technical solutions and delivering high-quality applications through Agile development practices. Participated in requirement analysis, solution design, code reviews, testing, deployment support, and production issue resolution while following engineering best practices.

National Single Window System (NSWS) | 2022-09 – Present

- Developed and enhanced Ministry and Investor portal modules using React, Redux, JavaScript, TypeScript, and Axios.
- Integrated DigiLocker verification for secure document authentication and compliance workflows.
- Developed a reusable Amendment Framework adopted across multiple ministries for managing post-approval modifications.
- Consumed and integrated REST APIs, ensuring reliable communication between frontend and backend systems.
- Improved application performance through reusable React components and efficient Redux state management.
- Participated in sprint planning, code reviews, release activities, debugging, and production issue resolution.

Technologies: *React.js, Redux, JavaScript, TypeScript, Axios, REST APIs, Git/GitLab, JIRA*

British Telecom (BT) | 2021-06 – 2022-09

- Worked on NGWFMT, a TCS product suite for planning and managing UK network connectivity tasks.
- Developed modules for EMP Tracker supporting task tracking, employee assignment, and cost-effective ducting plan creation.
- Built responsive, reusable React.js UI components for operational tracking and service monitoring.
- Integrated REST APIs

Technologies: *React.js, JavaScript, HTML5, CSS3, REST APIs, Map-based UI integrations*

Training Program | 2021-01 – 2021-05

TCS Ignite Completed a 5 month advanced training program in software development, Machine Learning, and DevOps, gaining proficiency in JavaScript, Python, Machine Learning, Java, and DevOps.

EDUCATION

Master of Computer Applications, *SASTRA University* 2021 – 2023

8.44 GPA

Bachelors of Computer Applications, *IMS UC* Ghaziabad | 2017 – 2020

75%

SKILLS

Frontend: React.js, Redux, Redux Toolkit, Context API, React Hooks, Single Page Applications (SPA), REST API Integration, Responsive Design

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Tools: Git, GitLab, GitHub, JIRA, Postman, VS Code, Jest (Unit Testing)

Other: Agile Methodologies, Software Development Lifecycle (SDLC), AI-Assisted Development (Claude, Copilot), AI-assisted Code Reviews, Code Review & QA, Performance Optimization, Functional Programming

ACHIEVEMENTS

Best Team Award, *Tata Consultancy Services* 01/11/2024

Given to the NSWS front-end team for delivering the platform revamp and keeping the portal stable through the rollout.

Best Team Award, *Tata Consultancy Services* 01/11/2023

Recognized for shipping the Amendment Framework and DigiLocker integration on schedule as a team.

Elevate Wings Award, *Tata Consultancy Services* 01/11/2022

Cleared TCS Elevate Wings, an internal assessment program, earning progression to a higher grade band and eligibility for TCS Digital roles.
